Sialkot

I'm a Frontend Web Developer, working mainly on web apps and websites. During studying software engineering I found myself specializing in frontend web development and I started my career as a front-end web developer. During my experience as a frontend Web Developer, I realize I can make an immediate impact on your organization with my unique blend of skills and passion. I've gained hands on expertise in Html, CSS, Bootstrap, JavaScript, jQuery, Ajax, React Js (Basic). During my different internships I've also learned how to communicate effectively and professionally, how to meet deadlines, and how to document the solutions.
